

Company Sustainability Policy

At Frucor Suntory we're hungry to make drinks better. We commit to producing great tasting, quality beverages with thoughtful use of resources and innovation that supports our 2030 sustainability commitments and improves our performance.

In addition to delivering safe, high-quality products that consumers love, we will continue to look for opportunities across our entire value chain that contribute to a sustainable society.

Our 2030 sustainability commitments set out to actively reduce our impact on the environment, fulfil compliance obligations, set clear and ambitious targets, goals and initiatives.

Frucor Suntory regularly reviews this policy and our sustainability commitments to ensure it reflects our growing knowledge of how we interact with our environment.

Frucor Suntory Environmental Policy Scope:

Frucor Suntory is committed to specific environmental goals by 2030

- Reduction of 33% in the amount of water used to manufacture Frucor Suntory New Zealand Ltd products (l/l ratio) on a 2015 baseline
- Zero waste to landfill for all sites
- 100% recyclable packaging
- Reducing our Carbon Emissions; for direct by 50%, & 30% indirect on a 2019 baseline
- 1 in every 3 drinks sold will be low or contain no sugar
- Continued compliance with all relevant environmental laws, regulations and compliance obligations as identified and required by ISO 14001:2015
- The continuous review of environmental targets and objectives will be the responsibility of The Sustainability Working Group and includes challenging current practices to improve our water, waste, packaging, sugar and GHG emissions in all areas of the business and make changes where there will be the greatest impact
- Further, to identify opportunities for the implementation of environmental policies and practices and the continuous improvement of our EMS to enhance environmental performance, which will contribute to environmental protection, over and above the positive impacts of improved resource use efficiency.
- Assurance that there is effective governance of all environmental initiatives so that continual improvement can be incorporated into existing business systems and measured
- Continuous commitment to the protection of the environment, prevention or minimisation of all onsite environmental hazards
- Partnership with key stakeholders to reduce the environmental impact of packaging throughout the lifecycle of the product. Key stakeholders include; all main packaging suppliers, industry product stewardship groups, Australian Packaging Covenant Organisation, Packaging Council (NZ), Auckland Council, & customers
- Provision of information and training to enable staff and contractors to meet their environmental goals
- Information relating to environmental objectives and performance against them will be made readily available via our communication channels.
